This is a voluntary scheme for anyone living at home, who might be reassured to know that essential information would be readily available to the Emergency Services should they suffer an accident or sudden illness. The scheme ensures that vital information is available not only to identify you, but to advise of relevant illnesses, allergies, medication and contact addresses.

When time is saved, lives are saved

When emergency services see medical information and personal details of a patient they can render safer and speedier First Aid by short cutting time consuming fact-finding enquiries about the patient.
